Amar Dia

Full Stack Developer | React, TypeScript, Node.js, PostgreSQL

Montreal, QC · 514 770-7757 · diaamar757@gmail.com · amardia.ca · linkedin.com/in/amar-dia · github.com/IBNOUDIA

PROFILE

Full stack developer with an Analyst-Programmer AEC from CDI College. I designed and launched two platforms with React, TypeScript and PostgreSQL: a site with a member area and an online store. Six years of coordination at ALDO Group taught me to work in teams, train users and improve processes.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, SQL, HTML, CSS; working knowledge of PHP, Python and Kotlin
- **Front end:** React, Next.js, Tailwind CSS, Vite, responsive design
- **Back end:** Node.js, Express, REST APIs, serverless functions
- **Databases:** PostgreSQL, Supabase, Prisma, MySQL, SQLite, MongoDB
- **Applied AI:** LLM integration with the OpenAI and Gemini APIs
- **Tools:** Git, GitHub, Vercel, Zod, Resend, WordPress, SAP
- **Method:** requirements analysis, data modeling, prototyping, documentation

PROJECTS

ACAFIS, association platform | acafis.ca | source code

React 19, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, Vercel Functions, Gemini, Resend

- Designed and built the bilingual public site, member area, activity registration and board administration: 15 PostgreSQL tables and about 18,600 lines of TypeScript.
- Prevented activity overbooking with locking PostgreSQL transactions and a waitlist that moves forward automatically.
- Implemented passwordless sign-in with one-time codes, hashed code storage and rate limiting.
- Integrated the Kocc Barma AI assistant (Gemini) for homework help and career guidance in French, English and Wolof.
- Kept the site on the free plans of Vercel and Supabase, with a daily scheduled job that stops the database from going to sleep.

Netbelset, Montreal-Dakar online commerce platform | netbelset.ca

Next.js 15, TypeScript, PostgreSQL, Prisma, Stripe, OpenAI, Zustand, Zod

- Built a bilingual store: cart, prices in Canadian dollars or CFA francs, order tracking and Stripe payments being finalized.
- Modeled 24 entities with Prisma and validated API requests with Zod.
- Created a made-to-measure clothing configurator with guided measurements in five steps.
- Integrated the Mbaya assistant (OpenAI): trilingual, voice, photo and PDF analysis, order tracking.

WORK EXPERIENCE

Founder and Developer, Netbelset | Montreal | 2026 to present

- Launching a Quebec-registered business: online store and digital services, including website creation.
- Handle the analysis, development and launch of the platform.

Driving Instructor, Tecnic Driving School | Montreal | May 2024 to present

- Assess each student, adapt the teaching to their level and track progress.
- Explain technical concepts simply to a diverse clientele.

Receiving and Shipping Coordinator, ALDO Group | Montreal | June 2018 to December 2024

- Coordinated daily department operations and delivery compliance.

- Managed inventory, orders and shipments in SAP.
- Improved logistics flows with the teams and developed optimization processes.
- Trained and supervised new employees, including on computer systems.

EDUCATION AND CERTIFICATIONS

- **AEC, Analyst-Programmer**, CDI College, Montreal, 2024 to 2026
- **Lean Six Sigma White Belt**, 2023
- **MARPPP**, participatory project planning method

COMMUNITY INVOLVEMENT

Co-founder, ACAFIS: a non-profit serving Senegalese families in Canada. Activity coordination, platform development and management of the Coop-ACAFIS WordPress site.
